JOURNAL OF APPLIED ELECTROCHEMISTRY **26** (1996) 1297–1301

Index to Volume 26 (1996)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and protection

Corrosion du zinc dans un milieu alcalin: Effect d un traitment de passivation chromique, 203
Electrooxidation of stainless steel AISI304 in carbonate aqueous solution at pH 8, 217
Anodic oxidation of zirconium: Effect of fluoride contamination on oxide structure and transport processes, 231
Influence of anions on the performance of isomers of aminobenzoic acid on the corrosion inhibition and hydrogen permeation through mild steel in acidic solutions, 291
A simple nondestructive electrochemical method to test the barrier resistance of organic coatings, 361
Impedance investigation of corrosion inhibition of armco iron by thiourea, 443
Passivation and pitting corrosion of tin in gluconate solutions and the effect of halide ions, 503
Adsorption of N-phenylmaleimide and its derivatives on iron electrodes in sulfuric acid solutions, 757
Control of oxygen deficiency in Ca1-x LaxMnO3-(and its cathodic properties in alkaline solution, 439
Impedance and transient study of aluminium barrier-type oxide films, 1027
Electrochemical behaviour of iron and iron oxide thin films in alkaline (1M KOH) aqueous solution: a voltammetry study for cathodic instability of coating/metal interface, 1045
Anodic dissolution of nickel in concentrated sulfuric acid solutions, 1083
Corrosion behaviour of duplex stainless steels containng minor ruthenium additions in reducing acid media, 1103
A cyclic voltammetric study on the study on the electrocatalysis of alkaline iron-electrode reactions, 1111
Characterization of the efficiency of antiscale treatments of water. Part I: Chemical processes, 1125
Impedance study of the passive film on stainless steel 304 in pH 8 carbonate sloution, 1169

Effluent and water treatment

Electrochemical reduction of nitrates and nitrites in alkaline nuclear waste solutions, 1
Electrochemical treatment of human wastes in a packed bed reactor, 18
Zinc removal from dilute solutions using a rotating cylinder electrode reactor, 369
Selective electrodeposition of metals from simulated waste solutions, 379
Electrochemical remediation of metal-bearing wastewaters Part 1: Copper removal from simulated mine drainage waters, 567
Recovery of pickling effluents by electrochemical oxidation of ferrous to ferric chloride, 693
Capacitive deionization of NH_4ClO_4 solutions with carbon aerogel electrodes, 1007

Electrocatalysis and kinetics

Electrocatalytic activities of graphite-supported platinum electrodes for methanol electrooxidation, 30
Cyclic voltammetry of KI at polyaniline-filmed Pt electrodes Part I: Formation of polyaniline-iodine charge transfer complexes, 36
Electrochemical behaviour of silver-containing copper anodes under simulated electrorefining conditions, 51
Oxygen evolution and hyperchlorite production on Ru-Pt binary oxides, 72
Stability and electrical properties of polyaniline films formed with EDTA and FeEDTA in the electrolyte, 95
The pH-dependence of thermally-coated Ti/TiO2 electrodes in the absence and presence of nitrobenzene, 195
Influence of carbon monoxide, ethylene, acetylene, ally alcohol and propargyl alcohol on nickel electrodissolution in aqueous sulfuric acid solution, 325
A study of RuO2 as an electrocatalyst for hydrogen evolution in alkaline solution, 397
A phenomenological approach to hydrous nickel oxide electrodes prepared by applying periodic potential routines, 493
Active surface areas in oxide electrodes by overpotential deposited oxygen species for the oxygen evolution reaction, 515
A survey of platinum hydrous oxide electrochemistry at elevated temperature: evidence for a new component in the β-deposit, 593
Determination of transport and electrochemical kinetic parameters of M-H electrodes, 603
Characterisation of Pt-Cu-Fe ternary electrocatalysts supported on carbon black, 623
Electrochemical absorption-desorption of hydrogen on multicomponent Zr-Ti-V-Ni-Cr-Fe alloys in alkaline solution, 639
Characterization of electroless Ni-Mo-P/SnO_2/Ti electrodes for oxygen evolution in alkaline solution, 733
Permeation and electrocatalytic reduction of oxygen by poly(o-phenylenediamine) incorporated into Nafion® film, 763
Investigation of the hydrogen evolution reaction at a 10wt% palladium-dispersede carbon electrode using electrochemical impedance spectroscopy, 953
Effect of coating thickness and surface treatment of titanium on the properties of IrO_2-Ta_2O_5 anodes, 999
Electrolytic generation of hydrogen on Pt-loaded porous graphite electrodes from flowing alkaline soultions, 1133
Oxygen electrocatalysis under fuel cell conditions: behaviour of cobalt porphyrins and tetraazaannulene analogues, 1139
Electrocatalytic properties of ternary oxide mixtures of composition $Ru_{0.3}$ $Ti_{(0.7-x)}$ Ce_xO_2: oxygen evolution from acidic solution, 1194

Electrochemical Engineering

Scale-up of an electrochemical cell for oxygen removal from water, 113
Theoretical and experimental studies of the effect of side reactions in copper deposition from dilute solutions on packed-bed electrodes, 135
A model for the Kolbe reaction of acetate in a parallel-plate reactor, 175

A model for the determination of chloride and chlorate levels in the caustic product of ion-exchange membrane chlor-alkali cells, 235
Multiple-electrode method for estimating the polarization resistance in large structures, 305
Current distribution in aluminium electrolysis cells with Søderberg anodes Part 1: Experimental study and estimate of anode consumption, 481
Application of metallic foams in an electrochemical pulsed flow reactor Part II: Oxidation of benzyl alcohol, 631
Current distribution in aluminium electrolysis cells with Søderberg anodes Part II: Mathematical modelling, 795
The effect of imposed electrical current on torque relaese at the metal-mudcake interface, 977
Hydrodynamic modelling of the liquid-solid behaviour of the circulating particulate bed electrode, 1094

Electrochemical synthesis and production

Production of ethene oxide in a sieve plate electrochemical reactor part 1: Influence of sieve plate design, electrode material and pH, 10
Electrocatalytic oxidation of 2-chlorophenol on a composite PbO_2/polypyrrole electrode in aqueous solution, 153
Studies of the oxidation of ethanol on a reticulated nickel rotating cylinder electrode, 211
Characteristics of polypyrrole chemically synthesized by various oxidising reagents, 425
Anodic oxidation of dimethyl sulfoxide based electrolyte solutions: an in situ FTIR study, 523
Paired electrooxidation Part III: Production of n-butyric acid from n-butanol, 543
Paired electrooxidation degradation of phenol with in situ electrogenerated hydrogen peroxide and hypochlorite, 673
Low temperature electrochemical oxidation of sulfur dioxide, 703
Electrosynthesis of a manganese (III) aminopolycarboxylate complex in alkaline media. 721
Indirect reduction of o- and m-nitrobenzoic acids at a Ti/ceramic TiO_2 cathode, 767
Electrochemical generation of ferrate Part 1: Dissolution of an iron wool bed anode, 815
Electrochemical generation of ferrate Part 2: Influence of anode composition, 823
An electrochemical device for oxygen production avoiding the generation of hydrogen, 881
Part I: Current efficiency during anodic dissolution of grey cast iron ferrate (VI) in concentrates alkali hydroxide solutions, 919
Part I: Current efficiency during anodic dissolution of white cast iron ferrate (VI) in concentrates alkali hydroxide solutions, 925
Electrocatalytic hydrogenation of soybean oil in a radial flow-through Raney nickel powder reactor, 989
The reduction of dioxygen in neutral solution at polypyrrole electrode, 1053
Concentration and purification of wet industrial pjosphoric acid by electro-electrodialysis, 1071

Electrochromism

Poly(3-methylthiophenes) for an all polymer electrochromic device, 121
A comparison of the electrochromic properties of WO3 films intercalated with H^+, Li^+ and Na^+, 647

Energy conversion batteries and fuel cells

Effect of operational potential on performance decay rate in a phosphoric acid fuel cell, 147
Evaluation of calcium-containing zinc electrodes in zinc/silver oxide cells, 227
The Li/Li^+ couple in propylene carbonate electrolytes and poly(methyl methacrylate) gels, 255
Development and electrochemical studies of gas diffusion electrodes for polymer electrolyte fuel cells, 297
High performance copper oxide cathodes for high temperature solid oxide fuel cells, 311
Performance and thermodynamic properties of Na-Sn and Na-Pb molten alloy electrodes for alkali metal thermoelectric converter (AMTEC), 343
Electrochemical impedance of AgO/Zn and HgO/Zn cells, 547
Influence of rib spacing in proton-exchange membrane electrode assemblies, 557
Electrochemical characterization of polymer precoated lithium electrodes, 689
A direct methanol fuel cell using acid-doped polybenzimidazole as polymer electrolyte, 751
Electroconductive membrane Celec for application in zinc/air alkaline batteries: An impedance study of oxygen reduction at the interface Pt/Celec, 833 Methanol permeability in perfluorosulfonate proton exchange membranes at elevated temeratures, 909
Low pressure hydride anode materials for rechargable batteries, 947
Chemical and morphological charachterization of a direct methanol fuel cell based on a quaternary Pt-Ru-Sn-W/C anode, 959

Instruments, methods and analysis

Correlation of in situ and ex situ responses of the QCM accompanying silver deposition, 171
An L-amino acid electrode for monitoring beer fermentation, 243
Meniscus shape and lateral wetting at the hanging meniscus rotating diskc (HMRD) electrode, 353
Chronoamperometry at channel electrodes: analytical theory of transient behaviour at double electrodes, 463
A solid polymer electrolyte-based ethanol gas sensor, 933

Mass transfer and hydrodynamics

Modelling mass transfer entrance lengths in turbulent pipe-flow with applications to small cathodes for measuring local mass transfer rates, 471
Mass transfer between a liquid and a binary rotating/fixed disk system in closed cylinder, 655
Voltammetry in the presence of ultrasound: mass transport effects, 775
Modelling electrode transients: the strongly implicit procedure, 865

Materials electrochemistry

Preparation of SnO_2-$Sb2O_5$ films by the spray pyrolysis technique, 83

Anodic dissolution of rapidly quenched amorphous Ni81P19 alloys of different initial melt temperatures, 403
Magnetic properties and microstructure of electrodeposited Fe-P amorphos alloy, 529
Electrochemically induced alumina coatings on stainless steel: composition and behaviour at high temperature, 617
Electrochemical properties of Ti/SnO_2-$Sb2O_5$ electrodes prepared by the spray pyrolysis technique, 683
Electrodeposition of membrane-oriented conducting poly(pyrrole, thiophene) on stainless steel meshes, 711
Synthesis and characterization of Pt-Ti_4O_7 microelectrode arrays, 785
Preparationa and evaluation of electrocatalytic oxide coatings on condauctive carbon-polymer composite substrates for use as a dimensionally stable anodes, 1117
Rate effect on lithium-ion graphite electrode performance, 1161
Effect of surface modification on performance of alloy electrodes for hydrogen storage, 1199

Metal and alloy deposition and dissolution

Study of electroless plating fog on plastic surfaces, 63
Physico-chemical properties of Zn-Fe alloy deposits from an alkaline sulphate bath containing triethanolamine, 90
Simultaneous reduction of perrhenate and nickel ions by hypophosphite, 118
Effect of magnetic charging of Ni on electrolytic codeposition of Zn with Ni particles, 129
Bulk copper electrodesposition on gold imaged by in situ STM: morphology and influence of tip potential, 161
Study of a mechanism of hard gold electrodeposition, 385
Electrodeposition of Sn-Co alloys from gluconate baths, 413
Effects of additives on the electrodeposition of tin from acidic Sn(II) bath, 419
A novel procedure in galvanic deposition of Zn alloys for the preparation of large area Ni and Ni-Co surfaces, 431
Silver electrocrystalization from a nonpolluting aqueous leaching solution containing ammonia and chloride, 451
Electrochemical investigation of Ni-P autocatalytic deposition in ammoniacal solutions, 487
Electrodeposition of Zn-Ni-Fe alloy in acidic chloride bath with separated anodes, 537
Pulse electroplating of rich-in-tungsten thin layers of amorphous Co-W alloys, 665
Behaviour of poly(ethylene glycol) during electrodeposition of bright copper coatings in sulfuric acid electrolytes, 741
Nucleation and crystal growth in gold electrodeposition from acid solution Part II: Soft gold, 843
Nucleation and crystal growth in gold electrodeposition from acid solution Part II: Hard gold, 853
Studies of platinum electroplating baths Part IV: Deposits on copper from Q bath, 873
Effect of halide ions on electroless nickel plating, 969
Effect of pulsating electrolysis parameters on the morphology and structure of Pd-Ag powder, 1059
Zinc-nickel alloy deposition in the presence of citrate ions, 1065
Influence of thiourea and thiourea ageing on the electrodeposition of copper from acid sulfate solutions studied by the ring-disk technique, 1179

Mineral and metallurgical electrochemistry

Electrochemical behaviour of silver-containing copper anodes under simulated electrorefining conditions, 51
High speed zinc electrowinning system using a hydrogen anode and a rotating aluminium disk cathode, 58
The chronopotentiometric method for measuring the kinetics of metal dissolution and cementation reactions, 509
Oxidation of arsenopyrite (FeAsS) in acid Part I: Reactivity of arsenopyrite, 575
Oxidation of arsenopyrite (FeAsS) in acid Part II: Stoichiometry and reaction scheme, 585
Relaxation of the lead-deficient sulfide surface layer on oxidised galena, 899
Interactions of aqueous silver ions with the surface of pyrite, 1185

Molten salt electrochemistry

Kinetics and mechanism of the AI(iii)/AI electrode reaction in cryolite-alumina melts, 102
Electrolytic recovery of chlorine from hydrogen chloride gas with fused molten salt electrolyte LiC1/KC1, 143
An electrochemical current efficiency model for aluminium electrolysis cells, 187
Investigation of the aluminium electrodeposition process in cryolite-based melts using a rotating ring-disc electrode: evidence for the existence of a subvalent intermediate species, 249
Electrochemical sensor for measuring magnesium content in molten aluminium, 269
Electrochemical refining of tin through thin-layers of molten electrolytes, 277
Electrodeposition of titanium diboride from fused salts, 319
Arsenic poisoning effects on cathodic polarization and hydrogen adsorption at platinum and steel electrodes in KF.2HF melts, 803
Electrodeposition of vanadium from a molten salt bath, 887
Design and performance of a laboratory cell for determination of current efficiency in the elctrowinning of aluminium, 1019
Electrochemistry of room-temperature chloroaluminate molten salts at graphitic and nongraphitic electrodes, 1147

Solid state electrochemistry

Control of oxygen deficiency in Ca_{1-x} $La_xMnO_{3-\delta}$ and its cathodic properties in alkaline solution, 439
Viscous flow and MOS properties of MgF_2-B_2O_3-GeO_2-SiO_2 glasses with ionic bonds, 551
Interfacial conductivity observation of CaF_2 ionic conductor films using Lewis-acidic effect, 613
An electrochemical steam pump using a proton conducting ceramic, 829
Anion incorporation and its effects on the dialectic constant and growth rate of zirconium oxides, 1037

Thermodynamics and properties

Characterization of aqueous rubidum chloride as an equitransferent ultraconcentrated salt bridge, 337
